

IT Staffing

In today's age, Technology powers business, but technology is powered by People.

In order to succeed in every aspect of technology implementation, you need to find the right set of individuals to implement it. At Clearis, we take pride in our approach to finding and retaining the right individuals. We actively look for men and women who are passionate about IT, show dedication to our clients and strive to maintain their skills current.

This is how our staffing services can help you:

- **Full Project Staffing** If you have just approved a project and you need to find the right technical staff to deliver it on time and on budget, we can assist you. We perform full-cycle services, bringing the best Project Managers in the Industry as well as Business Functional and Technical Experts to guarantee the success of your implementation.
- **Staff Augmentation** If you are staffing your project and need additional resources to supplement your own, we have a wide-range of technical and functional experts that can assist you during the appropriate project design, build, test or deployment phases of any project.
- **Temporary Services** Any organization knows the pain involved with resource turnover or additional workloads that require new resources in a short time-frame, even if it is only for a few weeks. We can get you the help you need, promptly and efficiently.
