

SMB IT Consulting

In today's economy Information Technology plays a crucial role, not only for big business companies, but also for Small and Medium Businesses (SMBs) in all Industries. All Entrepreneurs are especially adept at developing skills in all areas to get their businesses off the ground. It is not unusual for small business owners to become knowledgeable of computers, software selection, installation and minor configuration. As the business grows, it usually outgrows the IT infrastructure that initially supported the organization.

SMS struggle between the high expenses often perceived to be part of formalizing an IT department and the pain of continuing with an infrastructure that can no longer support the needs of the growing organization.

CLEARIS provides consulting services specifically designed for Small Businesses that can cost-effectively support the business needs without having to financially disrupt its goals and operations. These are some of the ways we can help you:

-Current Operations Analysis

-Automation Options

-Infrastructure assessment

-Hosted vs. Managed Model Analysis

These consulting services are designed to provide you with unbiased, price-effective advice to point you in the right direction not only for your company's present, but also consistent with its projected growth. Additionally, we have designed specific IT services designed to assist you in today's needs. To learn more, select an option from the menu items at the left.
